

**Manager****Comment**

Maneeshwar has been working on DC4H product line since more than 2 year and his contribution towards delivery of assigned component is found very good and accountable. He always ready to take new assignments, raise relevant concerns and try to complete them without much deviation in efforts estimated. He has to learn functional automation side with more strength and dedication to complete automation up to 90% of his components. He always ready to follow testing processes and standards followed.

As per his experience and contribution to product deliveries, I recommend to promote him from AP to P1 product testing as already nominated two times since 1 year

following are the points:  
delivered project on time.  
communicated with different region people and different projects.  
learned new products and worked on those projects.  
performed automation scripts.  
learned automation tools.  
open for growth in my career.
